I am an informatics student at Universitas Kristen Immanuel who has an interest in working in the field of web and software development. I am used to using various programming languages such as JavaScript, Python, and PHP, as well as various frameworks. I am a disciplined person who can work well in a team and has various project experiences. I am a passionate person in self-development and learning new things.

## Education

- **Universitas Kristen Immanuel** 2021 - present
  - Bachelor of Computer Science
  - GPA: 3.74 / 4.0
  - Relevant Coursework: Databases, Algorithms and Programming, Algorithms and Data Structures, Object Oriented Programming, Web Programming, Operating Systems, Software Engineering, Mobile Programming, Human and Computer Interaction, Software Development, Back-End Programming
- **SMA N Jumapolo** 2017 - 2020
  - Graduated Mathematics and Natural Science (MIPA)

## Experiences

- **Fullstack Developer Internship - PT. Winnicode Garuda Teknologi** September - Desember 2024
  - Created RESTful API applications using JavaScript/Node.js, ExpressJS, and PostgreSQL enhanced backend performance and reduced response times,
  - I created a web-based news portal application equipped with a CMS to manage content and also with a responsive display.
- **IT Pega Developer Internship - PT. Asuransi Sinar Mas** MSIB Batch - 6
  - Learn the basics of application development using PEGA,
  - Learn and build applications using PEGA according to user requests,
  - Working on real cases for creating applications for Sinar Mas Insurance and also for its affiliated companies using PEGA.
- **Sensasi Web Development Team - Yayasan Obor Emas Indonesai** October 2023 - present
  - Awarded a prestigious scholarship from Yayasan Obor Emas Indonesia, joined Sensai web development team; led maintenance and updates of Sensasi websites, including landing pages and admin applications, improving website performance and reliability.
- **Full-Stack Web Development Bootcamp - Binar Academy** September 2023 - February 2024
  - Created RESTful API applications using JavaScript/Node.js, ExpressJS, and PostgreSQL enhanced backend performance and reduced response times,
  - Developed a responsive Front-End using HTML/CSS, Bootstrap, and ReactJS,
  - I created a thrifting shop application, where this application functions as a platform for buying and selling goods. I made this application using ExpressJS as the Back-End framework and Bootstrap as the CSS/UI framework.

## Projects

---

### Winnicode News Portal

*Desember 2024*

- This application is a project that I worked on during my internship at PT Winnicode Garuda Teknologi. This application is used as a news source application that is also equipped with a CMS,
- I created this application using the JavaScript/node.js programming language, with the Express.js framework and PostgreSQL as a database server. On the client side, I used HTML, CSS, and Bootstrap to create an interface.

### Thriftling Shop

*January 2024*

- I created this project as a final project for Binar Academy's Full-Stack Web Developer BootCamp,
- This application can be used so that users can sell and buy goods, especially used goods,
- I created this application using JavaScript/Node.js programming language with the ExpressJS framework, and PostgreSQL as a database for the server side, and using HTML, CSS, and Bootstrap for the client side.

### Student Assessment Information System

*Juny 2023*

- I created this application as a project-based Software Engineering course assignment in semester 4. This application is used for data management and school administration, such as student data, teacher data, to-student grades in each subject,
- I created this application using the Python programming language with the Django framework, MySQL as a server database, and HTML, CSS, and Bootstrap for the client side.

### Library Management App

*May 2023*

- This application I made as a final project in the Advanced Web Programming course, when I was in the 4th semester. This application can be used as book data management in the library, which can store book data including the author and publisher of a book,
- I created this application using the PHP programming language with the Laravel framework and MySQL as a database for the server side, as well as HTML, CSS, and Bootstrap for the client side.

## Skills

---

- Soft Skills: Problem-Solving, Programing Logic, Teamwork, Individual Work, Analytical and Critical Thinking, Creative and Innovative,
- Hard Skills: Back-End Web Development, JavaScript/Node.js, PHP, Python, REST API, MySQL, PostgreSQL, HTML, CSS, Express.js, Laravel, Django, Bootstrap, Git & GitHub

## Sertifications

---

- Dicoding : Belajar Dasar Pemrograman Web *2022 - 2025*
- Dicoding : Belajar Membuat Aplikasi Back-End untuk Pemula *2023 - 2026*
- Dicoding : Belajar Membuat Front-End Web untuk Pemula *2022 - 2025*
- Dicoding : Belajar Dasar Structured Query Language (SQL) *2023 - 2026*
- Binar Academy : Full-Stack Web Development
- etc.
